QUESTIONS AND ANSWERS

Grace, Ida., Nov. 13.

Kindly answer in Semi-Weekly what position did W. H. Taft hold in the cabinet of the United States in May, 1908. What position in the cabinet did Elibu Root hold at this time?

GEO. A. TOOLSON.

(1) W. H. Taft was Secretary of War at that time. (2) Elihu Root is Secretary of State.

Salt Lake City, Nov 19.

Kindly decide the following argument. A says that an honorably dischargeed soldier (U. S. A. regulars) can dispose of his overcoat, providing that the purchaser takes off all buttons. B says that it is against the federal laws, and is liable to confiscation by the United States government.

A SUBSCRIBER.

The clothes which a soldier has on his discharge are his own, and he can do what he likes with them. But while he is in the service it is unlawful for him to dispose of any of them.

Salt Lake City, Nov. 19.
Will you, in your questions and and
answers department, please answer the
following questions: (1) Did the present empress of Russia adopt the Greek Catholic religion when she married the tzar? (2) Did the tzar of Russia try to get a diverce from the empress some time ago? (3) If so, on what ground?

Moscow Mine, Nov. 18.

Will you please answer in next Sunday's Tribune the following questions:
(1) A B and C are playing cribbage. A plays 6, B plays 4 and C plays 5, and claims a ran of 3 and 15-2 and 1 for the last card played, claiming 6 holes. Is be entitled to 1 for the last card, besides the 15-2? B says he is only entitled to 5 holes. Who is right? (2) Where is the city limits east, west, norh and south of Salt Lake City? (3) What is meant by the Star Route in connection with the delivery of mail?

SUBSCRIBER.

(1) C is right. (2) It is not easy to describe the limits otherwise than by a map or drawing; but The Tribune, during the recent campaign, printed a number of times a map of the election district, which is fairly accurate as to boundaries. (3) Those supplied by stage or on horseback.

Salt Lake City, Nov. 14, 1908. Will you kindly decide a dispute by informing us in Sunday's Tribune what Western states, other than Idaho, Utah and California, use free text books in their public schools, and oblige two readers of The Tribune. L. E. R.

We have no means of answering this

Twin Bridges, Mont. Nov. 10.

I see in the Semi-Weekly Tribune, November 5, 1908. Question and Answer column, "Copper Camp, Clyde, Ida., Getober 18, how many tons of hay in a stack 15 feet long 19 feet wide and 44 feet over?" Which is proper and correct? With your permission and for the benefit of the old farmer, I will give you the measurable method. Fifteen feet long, 19 feet wide; multiply 285 feet, subtract the width, 19 feet, from the over, 44 feet, and you have 25 feet. Divide by 2, which separates, the two watersheds of the stack, and levels the cone to a square height. Then, 25 feet divided by 2, and you have 1215 feet, which is the square height of stack. Multiply the 285 by the height, 1216 feet, which is the square height of stack. Multiply the 285 by the height, 1216 feet, 3682 divided by 422, which is the rule at 30 days rest for the stack to settle, and you have 8 tons, 186 feet; 342 feet per ton after 3 month's rest, is equivalent to 422 feet at 30 days rest, either by measure or weight. Standard rule or suthority of the overland stage run from Fort Leavenuverh west. Hoping I have not intruded upon your valuable time, and have given the old farmer the method he asks, I am very respectfully, E. M. POLLINGER.
